Morningstar Commodity's Marketplace Workflow Manager is a data-driven powerhouse that performs complex, customizable functions to refine data with proprietary business logic for risk managers, analysts, and traders, so that the results can be seamlessly integrated and distributed into end systems and front-end applications while saving time, money, and staff resources.

In consideration of clients who manipulate data output at a company level, Workflow Manager enables user creation of forward curves, simple logic, and other helpful market indicators from data stored in the cloud using an automation process for deriving data, informing risk management, and delivering results of downstream systems and operations.

Data Derivation

Enrich the data you use by applying customizable formulas to exchange and proprietary data to derive the data you need for analysis.

Automated Algorithms

Enhance day-to-day manual processes, such as data aggregation, data derivation, and risk management, and projects that require great levels of attention to detail, timeliness, and exactitude with Workflow Manager's automation so that the status can be easily tracked with alerts, freeing time and resources for higher priorities.

Minimize your workload and focus on uploading and maintaining the data sets that matter. Workflow Manager will automate the rest.

- ▶ Data Aggregation
- ▶ Reprocessing
- ▶ Data Derivation
- ▶ Curve Building
- ▶ Risk Management
- ▶ Auditing

High Performance

Cultivate high-quality data sets with Workflow's ability to generate hourly curves out 10-20 years. With 3,000+ curves automated, Workflow supports teams looking for a competitive advantage completing time-sensitive tasks.

Workflow Manager satisfies clients' needs with solutions to common day-to-day workload challenges.

Challenges

Inefficient

Inconsistent sources and formats
 Repetitive data and logic in multiple workbooks
 Error due to manual process

Time-consuming

Large amount of Excel worksheets
 Bottlenecks waiting due to dependent processing

Costly

High labor and various software costs

Workflow Solutions

Automated and Centralized

Eliminates manual data aggregation and waiting
 Ensures quality delivery and transparency
 Schedule and event-driven

Easy Data Derivation and Curve Building

Secure with SOC1 Compliance

Cost Savings

Reallocation of labor to value added areas
